Play. Explore. Empower.

# CATALOGUE 2020

## About Griddly Games

We are a Vancouver-based company that creates award-winning **STEM** games and **STEAM** science and art kits that deliver innovative, engaging fun that brings families and friends together.

Griddly Games was founded by Reisa Schwartzman in 2007. Reisa is a mother and a grandmother who took it upon herself to deliver wholesome family fun that multiple age groups can enjoy together. Griddly Games offers games and kits that inspire laughter and fun, while promoting an active and healthy curiosity and lifestyle. Griddly Games' philosophy is to encourage play, promote exploration, and empower self-development and lifelong learning.

## Our Games and Science Kits Promote:

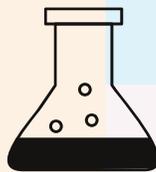

Our games and STEAM science and art kits develop different skills. For information on what skills each product develops refer to the legend below:

# STEAM Science + Art Kits

**Griddly Games STEAM Kits** combine science experiments and arts activities to inspire an interest in science and learning through hands-on, experiential play.

Using scientific observation, and strategic creative thinking, our mission is to encourage a lifelong exploration and self-empowerment in future generations.

All the kits provide everything you need to engage in multiple science and art activities.

We hope to nurture a passion for the subject of Science, Math, Engineering, Technology and Arts with every one of the games we create. More importantly, we hope to make playtime an unforgettable, fun learning experience.

## Just Add Fruits & Veggies FAMILY 8+

Study of Bio Organics & Systems

What do you do with all your old fruits and veggies - no need to throw them out! This cool STEAM kit will deliver hours of exploration, creativity, learning and enjoyment.

### Activities Included:

- |                                  |                   |
|----------------------------------|-------------------|
| Multiple fruits & veggies stamps | Growing plants    |
| Fruit & vegetable bouquet        | Mirror cleaner    |
| Celery stamped owl craft         | Shoe polishing    |
| Potato battery                   | Potato clock      |
| Fruit battery                    | Floating potato   |
| Capillary action with veggies    | Celery experiment |
| Osmosis experiment               | Lemon volcano     |
| Dehydrated potato                | Dancing grapes    |

### Science Lessons:

- |                      |             |
|----------------------|-------------|
| Chemical reactions   | Osmosis     |
| Study of electricity | Germination |

# Just Add Baking Soda

Learning of Bio Chemistry

FAMILY 8+

Future scientists and artists agree that this kit is explosive! This kit is the perfect mix of science and art for all creative kids.

## Activities Included:

- |                              |                          |
|------------------------------|--------------------------|
| Eruption print               | Lava lamp                |
| Baking soda volcano          | Watercolor paints        |
| How to make glue from milk   | Dinosaur eggs            |
| Dancing gummy worms          | Erupting ice chalk paint |
| Baking soda powered boat     | Baking soda ice cubes    |
| Stalactites & stalagmites    | Play dough               |
| Baking soda dough activities | Bath bomb                |
| Baking soda crystals         | Fizzy rocks              |
| Lemon juice experiment       | Invisible ink            |

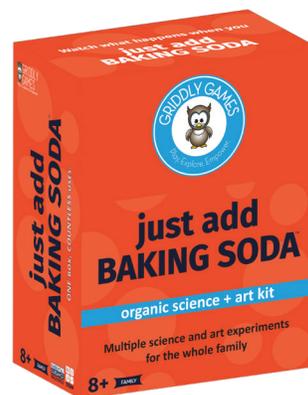

## Science Lessons:

- |                        |                  |
|------------------------|------------------|
| Understanding alkaline | States of matter |
| Chemical reactions     |                  |

# Just Add Egg

Study of Reactions

FAMILY 5+

This bio-organic STEAM kit, offers egg-citing activities for young artists and scientists to explore!

## Activities Included:

- |                            |                       |
|----------------------------|-----------------------|
| Naked and disappearing egg | Egg shell candle      |
| Egg shell geode            | Egg shell dying       |
| Egg dying                  | Egg shell mosaic      |
| Make your own dinosaur egg | Egg blowing           |
| Egg in a bottle            | Make your own chalk   |
| Vacuum egg                 | Egg shell hairy heads |

## Lesson Learned:

- Study of chemical reactions
- Experiments with pressure difference
- Study of membranes

# Just Add Sugar

## Study of Reactions

FAMILY 8+

This bio-organic STEAM kit, **Just Add Sugar™**, will sweeten the interests of budding artists and scientists alike! Make your own candy, sugar cubes and then clean up with your own homemade soap. Five science experiments and seven art activities included.

### Activities Included:

- Sugar crystals
- Sugar rainbow glass
- Sugar necklace
- Ice worm pond
- Make your own soap
- Sugar paper mache

- Decoupage yarn art
- Edible play dough
- Make a body scrub
- Feed your flowers
- Natural flystrip
- Super tie-dyed shirts

### Science Lessons:

- Densities of solutions
- Chemical reactions

# Just Add Sun

## Study of Heat

FAMILY 5+

Melt s'mores, make nachos, or even cook an egg with the power of the sun and the **Just Add Sun™** Solar Science and Art Kit. Learn about solar energy and introduce kids to eco-friendly energy alternatives. Six science and three art activities included. Package doubles as a solar oven.

### Activities Included:

- Balloon blow
- Mystery pop balloon
- Melting Ice
- Solar oven

- Build a thermometer
- Sundial
- Ice hands
- Wax paper sun catcher

### Science Lessons:

- Freezing and melting points
- Light absorption
- Reflections and heat transfer

CASE 4 units

# Just Add Glue

## Study of Polymers

FAMILY 6+

Create different forms of super stretchy polymers and make them bounce! Using the same set of ingredients, make an array of creative crafts that you can keep, like slime, crystals and window clings. Learn about states of matter with **Just Add Glue™**.

### Activities Included:

- Make your own sun catcher
- Make your own bouncy ball
- Make your own crystals
- Make your own window clings
- Make your own putty
- Make your own foam
- Make your own slime

### Science Lessons:

- Study of polymers
- Chemical reactions
- States of matter

# Just Add Milk

## Study of Surface Tension

FAMILY 5+

It's time to think twice about the milk in your cereal bowl! **Just add Milk™** encourages a curiosity for science combined with a love for experimenting with art. Observe changes in surface tension and create rainbow tie-dye keepsakes. Packaged in milk caddy display.

### Activities Included:

- Magic milk
- Milk painting
- Simple cosmic suncatcher
- Make a mouse pad
- Floating water
- Invisible soda pop
- Plastic milk
- Make natural glue

### Science Lessons:

- Surface tension
- Weakening molecular bonds
- Density of liquids

# STEM Games and Family Games

Griddly Games' family board games combine learning and fun to inspire an interest in learning through hands-on, experiential play. Using logic, language skills, creative and strategic thinking our mission is to encourage a lifelong interest in learning and empowerment in future generations.

This selection of **Griddly Games** are **STEM** games that inspire an interest in science and learning through interactive, family fun.

## Rocket Lander 3D Graphing

FAMILY 7+

In **Rocket Lander™** you can control a group of bold rockets exploring the vast world and outer space. Embark on an epic mission to settle and build the greatest rocket station. Fly the atmosphere, coordinate your rockets and overtake your opponents while defending your home turf. Rocket Lander™ is a three-dimensional STEM game hosting an X, Y and Z-axis that explores data literacy at any age.

### Skills Developed:

- Understanding three-dimensional mathematics
- Critical thinking
- 3D graphing
- Logic
- Mathematics skills - adding & subtracting
